

Dig Programs

PIPELINE INTEGRITY

With over 50 years of experience working on underground structures including oil and gas pipelines, distribution systems, electric transmission and distribution, water and sewer, Mears offers industry-leading underground solutions. Our services can be performed during an anomaly dig program, from a single dig to program management.

Our integrity solutions mainly focus on existing facilities to improve reliability via corrosion and pipeline integrity systems. All Mears Construction Foreman are AMPP/NACE CP1 certified or better.
