

HDD & DIRECT PIPE CAPABILITIES HEAVY CIVIL SERVICES

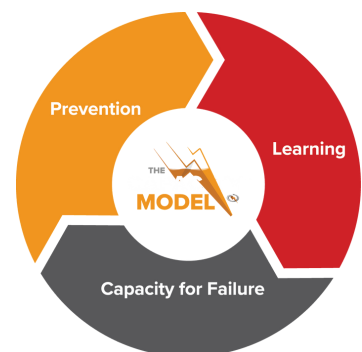

With decades of experience, Mears has a proven record of successfully completing complex, innovative, and award-winning projects.

As a part of our NO-SET™ brand of construction and maintenance services, we offer thermal grout for underground electrical infrastructure and associated cabling in combination with our trenching, cabling, boring, and HDD line of services.

OUR COMMITMENT

With a relentless focus on benefiting our clients, their customers, and our communities, Mears is committed to creating a brighter, more connected future together.

We are **changing** the way we do safety.

HORIZONTAL DIRECTIONAL DRILLING SERVICES

Our Horizontal Directional Drilling (HDD) and Direct Pipe® (DP) services provide safe, trenchless solutions to accurately and efficiently install underground pipelines and utilities across roads, railways, rivers and other obstacles.

With experienced professionals, modern equipment, and innovative solutions, Mears successfully delivers safe and economical projects and services that benefit our clients, their customers and our surrounding communities.
